C-DP.2.3 · Weekly check · 5 questions

MA.7.DP.2.3 · Find theoretical probability of an event · Unit 2 Probability · Given Thursday, on the week's benchmark

Form title C-DP.2.3 Check · Find theoretical probability of an event
Description Learning goal: I can find the theoretical probability of an event. 5 questions, 1 point each. Work each one out on paper, then choose or type your answer. Calculator allowed.
Locked mode OFF (calculator allowed; Locked mode blocks the Chromebook calculator)

Short-answer validation (already on the template's short-answer question; copy that question): Regular expression → Matches → `^-?(\d+(\.\d+)?|\.\d+|\d+/\d+|\d+ \d+/\d+)$`
Error text: Type only a number, like 12 or -3.5 or 2/7 or 4 1/3. No units, $, %, π or commas.

#	Question image	File · type	Options to add	Answer key	Pts
1	A fair 20-sided die has faces numbered 1 through 20. The die is rolled once. What is the probability of rolling a number greater than 15? Write your answer as a fraction in simplest form. Type a whole number, a decimal like 0.25, a fraction like 2/7 or -3/4, or a mixed number like 4 1/3 with a space after the whole number.	**Q1.png** Short answer	none (typed answer)	**1/4** Tick "Mark all other answers incorrect." Response validation: Regular expression, Matches (see top).	1
2	A fair spinner has 25 equal sections. 6 sections are green. The spinner is spun once. What is the probability that the spinner lands on green? Write your answer as a decimal. Type a number only. No units, $ or %.	**Q2.png** Short answer	none (typed answer)	**0.24 · .24** Tick "Mark all other answers incorrect." Response validation: Regular expression, Matches (see top).	1
3	A bag holds 12 marbles, and 3 of them are red. One marble is drawn at random. What is the probability of drawing a red marble? A. $\frac{3}{11}$ B. $\frac{1}{4}$ C. $\frac{3}{4}$ D. $\frac{1}{6}$	**Q3.png** Multiple choice	A B C D	**B**	1
4	Letter cards for the word MEASUREMENT are placed in a bag, one card for each letter, so there are 11 cards. Each card is equally likely to be drawn. One card is drawn at random. What is the probability that the card shows the letter M? Write your answer as a fraction in simplest form. Type a whole number, a decimal like 0.25, a fraction like 2/7 or -3/4, or a mixed number like 4 1/3 with a space after the whole number.	**Q4.png** Short answer	none (typed answer)	**2/11** Tick "Mark all other answers incorrect." Response validation: Regular expression, Matches (see top).	1
5	A standard deck has 52 cards: 13 cards (ace, 2 through 10, jack, queen and king) in each of four suits — hearts and diamonds, which are red, and clubs and spades, which are black. One card is drawn at random. What is the probability of drawing a card that is not a black king? Write your answer as a fraction in simplest form. Type a whole number, a decimal like 0.25, a fraction like 2/7 or -3/4, or a mixed number like 4 1/3 with a space after the whole number.	**Q5.png** Rigor Short answer	none (typed answer)	**25/26** Tick "Mark all other answers incorrect." Response validation: Regular expression, Matches (see top).	1
6	LEARNING GOAL I can find the theoretical probability of an event. 4 I can find the probability of an event described by a condition (such as 'an even number' or 'not red') and explain my count. 3 I can find the theoretical probability of a simple event and write it as a fraction, decimal, or percent. 2 I can count the favorable outcomes and the total outcomes. 1 I need help to start this.	**Level scale.png** Multiple choice (the template's last question)	Level 1 Level 2 Level 3 Level 4	no key	0

Answers with worked solutions are in the Answers folder next to the question images (same file names).
