1	A student recorded the 280 kilograms of material collected at a recycling drive. Paper: 126 · Plastic: 70 · Glass: 56 · Metal: 28 The student wants a display that answers this question at a glance: is Paper more than half of the total? Which display is the most appropriate? A. a bar chart B. a histogram C. a line plot D. a circle graph	**Q1.png** Multiple choice	A B C D	**D**	1
2	A class surveyed 150 students about the lunch they like best. Pizza: 60 Tacos: 45 Salad: 30 Pasta: 15 The class wants a display that answers this question at a glance: how many more students chose Pizza than chose Salad? Which display is the most appropriate? A. a histogram B. a line plot C. a circle graph D. a bar chart	**Q2.png** Multiple choice Same problem, now multiple choice (paper: multiple choice)	A B C D	**D**	1
3	A gardener measured the heights of 120 sunflowers to the nearest centimeter. The heights run from 92 cm to 187 cm, and almost every value is different. The gardener wants one display that shows the overall shape of the distribution at a glance, without a mark or a digit for each of the 120 heights. Which display is the most appropriate for this data set? A. a circle graph B. a stem-and-leaf plot C. a histogram D. a line plot	**Q3.png** Multiple choice Same problem, now multiple choice (paper: multiple choice)	A B C D	**C**	1
4	The data shows the number of pets for 16 students: 1, 0, 3, 1, 1, 2, 1, 0, 1, 2, 0, 1, 0, 0, 1, 2 Which display shows every value and how often it occurs, and fits these data? A. A box plot, because it shows the median and the spread of the values. B. A line plot with 7 Xs above 0, 5 above 1, 3 above 2 and 1 above 3, because there are only a few different values. C. A histogram with one bar for 0–1 and one bar for 2–3, because it groups the values into intervals. D. A line plot with 5 Xs above 0, 7 above 1, 3 above 2 and 1 above 3, because there are only a few different values.	**Q4.png** Multiple choice Same problem, now multiple choice (paper: a written answer)	A B C D	**D**	1
5	The two displays show the same data: the numbers of minutes 20 students spent reading over the weekend. Which display can be used to find the interquartile range of the data, and why? What is the interquartile range? **Display A**  **Display B**  A. Display B, the histogram, because it shows how many values are in each interval; the interquartile range is 10 minutes. B. Display A, the box plot, because it marks the quartiles; the interquartile range is 45 minutes. C. Display B, the histogram, because it shows every interval; the interquartile range is 8 minutes. D. Display A, the box plot, because it marks the quartiles; the interquartile range is 10 minutes.	**Q5.png** Rigor Multiple choice Same problem, now multiple choice (paper: a written answer)	A B C D	**D**	1

6		**Level scale.png** Multiple choice (the template's last question)	Level 1 Level 2 Level 3 Level 4	no key	0
