C-AR.4.3 · Weekly check · 5 questions

MA.7.AR.4.3 · Graph proportional relationships · Unit 11 Representing Proportional Relationships · Given Thursday, on the week's benchmark

Form title C-AR.4.3 Check · Graph proportional relationships
Description Learning goal: I can graph proportional relationships. 5 questions, 1 point each. Work each one out on paper, then choose or type your answer. Calculator allowed.

#	Question image	File · type	Options to add	Answer key	Pts
1		**Q1.png** Multiple choice	A B C D	**B**	1
2		**Q2.png** Multiple choice Same problem, now multiple choice (paper: multiple choice)	A B C D	**A**	1

3	The relationship between hours (x) and miles biked (y) is proportional, with a constant of proportionality of 12. Which graph represents this relationship for 0 to 6 hours, and what does the constant of proportionality mean in this situation? **Graph 1**  **Graph 2**  **Graph 3**  **Graph 4**  **A.** Graph 3; each hour, 6 more miles are biked. **B.** Graph 4; each hour, 12 more miles are biked. **C.** Graph 4; it takes 12 hours to bike 1 mile. **D.** Graph 1; it takes 12 hours to bike 1 mile.	**Q3.png** Multiple choice Same problem, now multiple choice (paper: a written answer)	A B C D	**B**	1
4	A proportional relationship is given by the equation $y = 14x$. Which graph represents this relationship for x-values from 0 to 10? **Graph A**  **Graph B**  **Graph C**  **Graph D** 	**Q4.png** Multiple choice Same problem, now multiple choice (paper: a written answer)	A B C D	**A**	1
5	The constant of proportionality for a proportional relationship between x and y is $\frac{8}{5}$. Which graph shows the relationship, and is the point $(40, 64)$ on its line? The grids stop at $x = 25$. **Graph 1**  **Graph 2**  **Graph 3**  **A.** Graph 2; no, because $\frac{5}{8} \times 40 = 25$, not 64. **B.** Graph 1; yes, because $\frac{8}{5} \times 40 = 64$. **C.** Graph 1; no, because $64 \div 40 = 1.6$, not $\frac{8}{5}$. **D.** Graph 3; no, because $64 - 40 = 24$, not $8 - 5 = 3$.	**Q5.png** Rigor Multiple choice Same problem, now multiple choice (paper: a written answer)	A B C D	**B**	1
6	**LEARNING GOAL** I can graph proportional relationships. **4** I can use a graph to find the constant of proportionality and interpret it in context. **3** I can graph a proportional relationship and identify the points (0, 0) and (1, r). **2** I can plot points from a table. **1** I need help to start this.	**Level scale.png** Multiple choice (the template's last question)	Level 1 Level 2 Level 3 Level 4	no key	0

Answers with worked solutions are in the Answers folder next to the question images (same file names).
