#	Question image	File · type	Options to add	Answer key	Pts
1	Select **all** the situations that describe a proportional relationship. *Select **all** the correct answers.* **A.** A gym charges $38 to join plus $11 each month. **B.** A store sells grapes at $1.85 per pound. **C.** A recipe uses 7 cups of flour for every 4 loaves of bread. **D.** A candle is 9 inches tall and burns down 1 inch each hour (its height compared with the hours burned). **E.** A phone plan costs $34 plus $0.15 for each text message.	**Q1.png** Checkboxes	A B C D E	Check: **B, C** One point only if exactly these are checked.	1
2	Does the table show a proportional relationship between x and y? x | y 1 | 3 3 | 9 4 | 12 5 | 15 **A.** Yes, because y increases whenever x increases. **B.** No, because $y \div x$ is not the same for every pair of values. **C.** No, because the x-values do not increase by the same amount. **D.** Yes, because $y \div x$ is the same for every pair of values.	**Q2.png** Multiple choice	A B C D	**D**	1
3	A stand charges 15 dollars plus 12 dollars for each pound of apples. Is the relationship between the pounds of apples and the total dollars proportional? **A.** Yes, because the dollars added for each pound of apples never change. **B.** No, because the dollars and the pounds of apples are measured in different units. **C.** No, because there is a charge of 15 dollars before the first pound of apples. **D.** Yes, because there is no charge at the start, only 12 dollars each time.	**Q3.png** Multiple choice	A B C D	**C**	1
