C-DP.2.3 · Comparison (review) · 2 questions

MA.7.DP.2.3 · Find theoretical probability of an event · Unit 2 Probability · Given Wednesday, with a re-check, when this benchmark was taught earlier but not retaught

Form title C-DP.2.3 Review · Find theoretical probability of an event
Description 2 questions, 1 point each. Work each one out on paper, then choose or type your answer. Calculator allowed.
Locked mode OFF (calculator allowed; Locked mode blocks the Chromebook calculator)

Short-answer validation (already on the template's short-answer question; copy that question): Regular expression → Matches → `^-?(\d+(\.\d+)?|\.\d+|\d+/\d+|\d+ \d+/\d+)$`
Error text: Type only a number, like 12 or -3.5 or 2/7 or 4 1/3. No units, $, %, π or commas.

#	Question image	File · type	Options to add	Answer key	Pts
1	A jar holds 20 buttons, and 7 of them are blue. One button is drawn at random. What is the probability of drawing a blue button? A. $\frac{7}{27}$ B. $\frac{7}{13}$ C. $\frac{7}{20}$ D. $\frac{13}{20}$	**Q1.png** Multiple choice Same problem, now multiple choice (paper: multiple choice)	A B C D	**C**	1
2	A digital spinner has 40 equally likely sections. Nine of the sections are orange. The spinner is spun once. What is the probability that the spinner lands on orange? Write your answer as a decimal. Type a number only. No units, $ or %.	**Q2.png** Short answer	none (typed answer)	**0.225 · .225 · 9/40 · 0.2250 · .2250** Tick "Mark all other answers incorrect." Response validation: Regular expression, Matches (see top).	1
