C-AR.4.4 · Weekly check · 5 questions

MA.7.AR.4.4 · Translate between representations · Unit 11 Representing Proportional Relationships · Given Thursday, on the week's benchmark

Form title C-AR.4.4 Check · Translate between representations
Description Learning goal: I can write an equation for a proportional relationship. 5 questions, 1 point each. Work each one out on paper, then choose or type your answer. Calculator allowed.

1	The graph shows a proportional relationship between batches made (x) and cups of flour used (y). Which equation represents this relationship?  A. $y = x + 1$ B. $y = 5x$ C. $y = 1.25x$ D. $y = 0.8x$	**Q1.png** Multiple choice Same problem, now multiple choice (paper: a written answer)	A B C D	**C**	1
2	A recipe uses $\frac{5}{4}$ cup of sugar for each batch of muffins. The relationship is proportional. Let x be the number of batches and let y be the number of cups of sugar. Which equation represents this relationship? A. $y = \frac{5}{4}x$ B. $x = \frac{5}{4}y$ C. $y = x + \frac{5}{4}$ D. $y = \frac{4}{5}x$	**Q2.png** Multiple choice	A B C D	**A**	1
3	The table shows a proportional relationship between x and y. x | y 2 | 6 5 | 15 7 | 21 Which equation represents this relationship? A. $y = 3x$ B. $y = x + 4$ C. $y = 6x$ D. $y = \frac{1}{3}x$	**Q3.png** Multiple choice Same problem, now multiple choice (paper: a written answer)	A B C D	**A**	1
4	A machine fills 4.5 bottles each minute that it runs, on average. The relationship between the number of minutes and the number of bottles is proportional. Number of minutes | Number of bottles 6 | ? 8 | ? 10 | ? Which choice gives the three missing values, in order? A. 24, 32, 40 B. 27, 36, 45 C. 27, 31.5, 36 D. 54, 72, 90	**Q4.png** Multiple choice Same problem, now multiple choice (paper: a written answer)	A B C D	**B**	1
5	Diego earns $11 per hour walking dogs. The relationship between the money earned, e, and the hours worked, h, is proportional. Which equation gives the number of hours, h, that Diego must work to earn e dollars? A. $h = 11e$ B. $h = e - 11$ C. $e = \frac{1}{11}h$ D. $h = \frac{1}{11}e$	**Q5.png** Rigor Multiple choice	A B C D	**D**	1
6	LEARNING GOAL I can write an equation for a proportional relationship. 4 | I can translate between a table, a graph, an equation, and a description of the same relationship. 3 | I can write the equation y = kx from a table, graph, or description and use it. 2 | I can find the constant of proportionality. 1 | I need help to start this.	**Level scale.png** Multiple choice (the template's last question)	Level 1 Level 2 Level 3 Level 4	no key	0

Answers with worked solutions are in the Answers folder next to the question images (same file names).
