1	The graph shows a proportional relationship between hours (x) and miles walked (y). Which equation represents this relationship?  A. $y = x + 11$ B. $y = 3.75x$ C. $y = \frac{4}{15}x$ D. $y = 15x$	**Q1.png** Multiple choice Same problem, now multiple choice (paper: a written answer)	A B C D	**B**	1
2	A printer prints at a constant rate. The proportional relationship is represented by $y = 18x$, where x is the number of minutes of printing and y is the number of pages. Which description matches this relationship? A. The printer prints 18 pages each minute. B. The printer prints 18 more pages each minute than the minute before. C. The printer takes 18 minutes for each page. D. The printer prints 18 pages in all.	**Q2.png** Multiple choice	A B C D	**A**	1
3	A gardener uses $\frac{1}{2}$ bag of soil for each planter. The relationship is proportional. Let x be the number of planters and let y be the number of bags of soil. Which equation represents this relationship? A. $y = 2x$ B. $x = \frac{1}{2}y$ C. $y = \frac{1}{2}x$ D. $y = x + \frac{1}{2}$	**Q3.png** Multiple choice	A B C D	**C**	1

Answers with worked solutions are in the Answers folder next to the question images (same file names).
