DPP: Units 9 and 10

Algebraic Expressions (AR.1.1, AR.1.2) and Equations and Inequalities (AR.2.2, AR.2.1) · October 26 to December 18

In this folder

File	What it is
00 Start here	This guide: the forms, the week, the calendar, which Review form goes with which Re-check, the Thursday PLC agenda, and a log page.
01 Scales to post	One poster per benchmark: the learning goal, the four levels, and what each level looks like. Post it the week the benchmark is taught.
02 PLC item guide	Every question on the 12 forms: the answer, the worked solution, what each wrong answer means, and the reteach lesson that fixes it.
03 Reteach lessons	20 short lessons, one for each Check question: the idea, a worked example, Your turn and three practice problems, then an answer page. Made to project.
04 Paper copies	All 12 forms on paper, with the scale question on each Check, for a day the Chromebooks or the network are down.
DPP Forms script kit	The forms builder, updated. `ONLY: 'Unit 9, Unit 10'` builds just these 12 forms.

The 12 forms

Form	Questions	Calculator	Locked mode	When
C-AR.1.1 Check	5	No	On	Wednesday of the week it is taught
C-AR.1.1 Re-check	3	No	On	The Tuesday after, following the reteach
C-AR.1.1 Review	2	No	On	With the next benchmark's Re-check
C-AR.1.2 Check	5	No	On	Wednesday of the week it is taught
C-AR.1.2 Re-check	3	No	On	The Tuesday after, following the reteach
C-AR.1.2 Review	2	No	On	With the next benchmark's Re-check
C-AR.2.2 Check	5	Allowed	Off	Wednesday of the week it is taught
C-AR.2.2 Re-check	3	Allowed	Off	The Tuesday after, following the reteach
C-AR.2.2 Review	2	Allowed	Off	With the next benchmark's Re-check
C-AR.2.1 Check	5	Allowed	Off	Wednesday of the week it is taught
C-AR.2.1 Re-check	3	Allowed	Off	The Tuesday after, following the reteach
C-AR.2.1 Review	2	Allowed	Off	With the next benchmark's Re-check

The Comparison forms are titled "Review", and that is the name students see. Only Checks end with the scale and the "Which level are you at?" question.

The week

1. **Monday:** post the week's scale. Teach the reteach lesson the PLC picked last Thursday (8 to 10 minutes).
2. **Tuesday:** the Re-check on the retaught benchmark, then the Review form (two short forms, about 8 minutes together).
3. **Wednesday:** the Check on this week's benchmark (about 10 minutes). Students answer five questions, rate their level on the last one, and see their score when they submit.
4. **Thursday PLC:** 10 minutes on the results (page 3). Log the decision.

Each form needs a school copy first: links sheet → Copy link → Make a copy, Locked mode on for the Unit 9 forms, Publish to your school, post the link (page 3).

Calendar

Week	Teaching	Monday and Tuesday	Wednesday	Thursday PLC
Oct 26–30	Unit 9: AR.1.1	Teach as planned	**Check C-AR.1.1**	Pick the AR.1.1 reteach. John previews C-AR.1.2.
Nov 2–6	Unit 9: AR.1.2	Mon: reteach AR.1.1 Tue: **Re-check C-AR.1.1**. No Review form this first time.	**Check C-AR.1.2**	Pick the AR.1.2 reteach. **Cycle 1** complete: log it.
Nov 9–13	Unit 9 review and test	Mon: reteach AR.1.2 Tue: **Re-check C-AR.1.2 + Review C-AR.1.1**	No school (Veterans Day). No new Check: short week, unit test.	**Cycle 2** complete: log it.
Nov 16–20	Unit 10 begins: AR.2.2	Teach as planned	No Check: the week before a break	John previews C-AR.2.2.
Nov 23–27	Thanksgiving break			
Nov 30–Dec 4	Unit 10: AR.2.2	Teach as planned	**Check C-AR.2.2**	Pick the AR.2.2 reteach. John previews C-AR.2.1.
Dec 7–11	Unit 10: AR.2.1	Mon: reteach AR.2.2 Tue: **Re-check C-AR.2.2 + Review C-AR.1.2**	**Check C-AR.2.1**	Pick the AR.2.1 reteach. **Cycle 3** complete: log it.
Dec 14–18	Unit 10 review and test	Mon: reteach AR.2.1 Tue: **Re-check C-AR.2.1 + Review C-AR.2.2**	No new Check: the week before winter break	**Cycle 4** complete: log it. Q2 snapshot and reflection.

Built on: Unit 9 from October 21 to November 13 and Unit 10 from November 16 to December 18, with two-step equations (AR.2.2) taught before one-step inequalities (AR.2.1). If your order or pacing differs, move the rows: each Check goes on the Wednesday of the week its benchmark is taught, and the rest of the routine follows it.

Lake County dates: no school Wednesday, November 11 (Veterans Day) and November 23–27 (Thanksgiving); the second quarter ends December 18. Short weeks, unit-test weeks and weeks before a break are logged as “no check”, as the DPP says.

By winter break: 4 Checks and 4 complete reteach cycles, 3 of them with a Review form.

Which Review form goes with which Re-check

Re-check	Review form with it	Why that one
C-AR.1.1 · Nov 3	none	The first cycle: no earlier benchmark has been re-checked yet.
C-AR.1.2 · Nov 10	C-AR.1.1 Review	Always the benchmark from the cycle before. It was retaught and re-checked in the cycle before and not retaught since, so its change from that Re-check to this Review shows what happens without a reteach. The retaught benchmark’s gain (Check → Re-check) has to beat that change: that is impact measure 1.
C-AR.2.2 · Dec 8	C-AR.1.2 Review	
C-AR.2.1 · Dec 15	C-AR.2.2 Review	

If the PLC ever decides “no reteach” for a benchmark, it has no Re-check; its Check score is the starting point when it comes up as a Review.

Thursday PLC: 10 minutes

1. **Open the results.** Your school copy of Wednesday's Check → Responses → Summary. Each question shows how many got it right. Find the lowest.
2. **Read the wrong answers.** On that question, find the answer most students picked. The PLC item guide says what it means and names the reteach lesson.
3. **Decide and log.** The lowest question, the wrong answer behind it, the reteach lesson, and the day each of you teaches it. Use the log page.
4. **Look at the self-ratings.** The last question on the Check: how many rated themselves at the level their score shows (5 right = level 4, 4 = level 3, 2–3 = level 2, 0–1 = level 1)? That is impact measure 3.
5. **Preview next week's Check.** John reviews its five questions for alignment and rigor (his action step). The paper copy is the quickest way.

Two questions tied? Pick the one whose wrong answers bunch on one choice: one clear mistake is the easiest to reteach.

80% or more at mastery? The decision can be "no reteach". Log it, and skip that Re-check.

Building and giving the forms

1. **Not built yet:** follow *00 Script setup* in the kit. To build these 12 first, set `ONLY: 'Unit 9, Unit 10'` and run buildForms (about 6 minutes); clear it later and run again for the rest.
2. **Built with the earlier kit:** keep those forms; the questions and keys are the same. Paste the new Code.gs over the old one and run **updateMessages** once, so the page students see after submitting stops mentioning a progress strip.
3. **Each week:** signed in to your school account, links sheet → **Copy link** → Make a copy → Locked mode on for Unit 9 forms → **Publish** to your school → post the link in your Classroom and send it to John for his.
4. **Keep the results:** on each school copy, Responses → **Link to Sheets** → your one DPP responses spreadsheet. After the first Check, send Claude that tab's header row (no student rows) and the tracker gets rebuilt to read the responses directly, names and all, inside your school account.
5. **Paper day:** print from *04 Paper copies*, score with the key line in the item guide, and enter the scores by hand.

DPP evidence to save by December 18

What the DPP lists	From Units 9 and 10
Tracking sheet snapshot with a written reflection, end of Q2	Save a copy of the tracking sheet on December 17 or 18 and write the reflection: what the four cycles showed.
The PLC decision log	The log page that follows, filled in.
Sample checks with the scale and answer keys	Any Check from *04 Paper copies* with its page from the item guide.
One check's results summary and three student progress records per quarter, names removed	Print the Summary page of one Check. Choose three students and copy their score and self-rated level for each week, without their names.

PLC log · Units 9 and 10

Date	Results looked at	Lowest question (% right)	Most-picked wrong answer: what it means	Reteach lesson · day	Self-ratings matching	Notes · next Check previewed
Oct 29	Check C-AR.1.1					
Nov 5	Check C-AR.1.2 Re-check C-AR.1.1					
Nov 12	Re-check C-AR.1.2 Review C-AR.1.1					
Nov 19	(preview C-AR.2.2)					
Dec 3	Check C-AR.2.2					
Dec 10	Check C-AR.2.1 Re-check C-AR.2.2 Review C-AR.1.2					
Dec 17	Re-check C-AR.2.1 Review C-AR.2.2					

This is the PLC decision log the DPP names as evidence. Keep it in the binder, or copy each row into the tracker's log tab.
